

JISHAN JAVALI

Project Manager

Phone: +91 9986208573 | Email: jjavali93@gmail.com | [linkedin.com/in/jishanjavali](https://www.linkedin.com/in/jishanjavali)
Current Location: India | Open to Immediate Relocation: United Arab Emirates

PROFESSIONAL SUMMARY

Results-driven IT Project Manager with 9+ years of experience leading enterprise technology rollouts, Agile and hybrid program delivery, and cross-functional engineering teams across security systems, CRM/Salesforce, and ERP environments. Proven record of delivering measurable cost savings (US\$200,000+ across engagements), accelerating release cycles by up to 85%, and maintaining zero non-conformance audit outcomes. Skilled in stakeholder management, vendor negotiation, and executive reporting across UK, US, and India-based teams. PMP and Google Project Management certifications in progress. Immediately available to relocate to the UAE.

PROFESSIONAL EXPERIENCE

IT Project Manager — SecureWais UK Ltd

Sep 2024 – May 2026 | London Area, United Kingdom

- Orchestrated end-to-end delivery of an enterprise security systems rollout using JIRA and Confluence, coordinating 4 cross-functional engineering teams to deploy pilot solutions across 25 client sites.
- Optimized Microsoft Azure-hosted security platforms by identifying and decommissioning underutilized legacy environments, delivering £52,000+ in verified cost savings within the first quarter.
- Accelerated deployment cycles for CCTV, access control, and monitoring applications by integrating Jenkins-based CI/CD pipelines, reducing release time from 6 hours to under 1 hour per deployment.
- Aligned requirements across Security Operations, Client Services, and Engineering to deliver mission-critical system upgrades, ensuring uninterrupted protection for high-traffic commercial facilities during peak operating periods.
- Designed real-time executive dashboards in Power BI to track deployment progress, incident response metrics, and system uptime, enabling leadership to reassign senior engineers to high-risk client installations.
- Strengthened API gateway and system integration security during a platform migration, resolving 12 critical vulnerabilities and safeguarding sensitive access and surveillance data.
- Led Agile ceremonies including daily stand-ups and sprint retrospectives for a 15-member engineering and QA team, maintaining a consistent delivery velocity of 40+ story points per sprint.
- Directed implementation of a centralized asset and device tracking system across all client deployments.

TSE Associate Lead — Salesforce

Nov 2022 – Aug 2024 | Bangalore, India

- Spearheaded the deployment of custom Sales Cloud features using Lightning Web Components (LWC), enabling the enterprise sales team to process 500+ additional qualified leads during Q3 2023.
- Engineered robust API integrations via MuleSoft Anypoint Platform, automating data synchronization between legacy ERP systems and Salesforce to save the data operations team 25 hours per week.
- Standardized release management protocols using Salesforce DX and Copado, cutting the average critical bug resolution time from 4 days to 8 hours.
- Revitalized client reporting structures by embedding Tableau CRM dashboards, providing real-time churn insights that helped account managers recover \$150,000 in at-risk revenue.
- Mobilized a cross-functional task force to migrate 10,000 user accounts from Salesforce Classic to Lightning Experience without a single minute of unplanned system downtime.
- Validated rigorous security compliance controls (SOC2) across the Service Cloud environment, ensuring the system passed the annual external audit with 0 non-conformance findings.
- Championed the Go-to-Market (GTM) technical strategy for a new SaaS vertical, coordinating deliverables across 3 global time zones to meet the strict hard-launch deadline.
- Negotiated renewed contracts for third-party testing vendors, securing a fixed rate that reduced the department operating budget by \$40,000 annually.

Lead Client Linked — HCLTech

May 2019 – Oct 2022 | India

- Led end-to-end design, development, and deployment of enterprise-scale Salesforce solutions across Sales Cloud, Service Cloud, and Experience Cloud, aligning technical solutions with business objectives.
- Managed and mentored a cross-functional team of Salesforce developers, administrators, QA engineers, and Business analysts, ensuring successful delivery of multiple Agile project releases.
- Architected and developed scalable Salesforce applications using Apex, Lightning Web Components (LWC), Visualforce, SOQL, and Salesforce Flows, improving system performance and user experience.
- Designed and implemented integrations between Salesforce and external enterprise systems using REST/SOAP APIs, middleware platforms, and ETL tools, enabling seamless data exchange.
- Established best practices for code reviews, release management, CI/CD pipelines, security governance, and quality assurance, resulting in improved deployment efficiency and platform stability.
- Collaborated closely with business stakeholders, solution architects, and leadership teams to gather requirements, define technical roadmaps, and deliver scalable digital transformation solutions. Integrated edge computing sensors with the central manufacturing execution system (MES), cutting data transmission latency to under 200 milliseconds for real-time robotic arm control.
- Modernized the finished vehicle logistics tracking system, optimizing delivery routes to save 2,000 miles of unnecessary transport per month across the Midwest region.

Application Engineer — Best Engineering Aids & Consultancies

Feb 2018 – Apr 2019 | India

- Delivered performance testing and software validation support across client engagements, contributing to engineering quality and delivery readiness.
- Built foundational expertise in software performance testing, applied engineering tools, and structured technical documentation.

Project Engineer — CSIR – National Aerospace Laboratories (NAL)

Feb 2016 – Jan 2018 | Bangalore, India

- Supported aerospace engineering project execution, coordinating technical documentation and cross-team deliverables in a research and development environment.

CORE SKILLS

Project & Program Management: Project Planning & Scheduling, End-to-End Project Delivery, Scope Management, Cost & Budget Management, Resource Allocation, Risk & Issue Management, Change Management, Dependency Tracking, Milestone Management, Portfolio Management, Cross-Functional Leadership, Business Intelligence

Methodologies & Frameworks: Agile (Scrum, Kanban), Waterfall, Hybrid (Agile-Waterfall), SAFe, SDLC

Agile & Scrum Practices: Sprint Planning, Backlog Grooming, User Story Creation, Sprint Reviews & Retrospectives, Velocity Tracking, Release Planning, PI Planning, Agile Metrics (Burn-down, Burn-up, Cycle Time)

Stakeholder & Communication Management: Stakeholder Engagement, Executive Reporting, Cross-Functional Collaboration, Client Communication, Vendor Management, Conflict Resolution, Presentation & Facilitation

Tools & Technologies: JIRA, Confluence, MS Project, Azure DevOps, Smartsheet, ServiceNow, MS Excel (Advanced), PowerPoint, Visio, SharePoint

Financial & Governance: Project Budgeting & Forecasting, Cost Control, CAPEX/OPEX Tracking, Procurement Coordination, Contract Management, Compliance & Audit Support

Leadership & Team Management: Team Leadership, Mentoring & Coaching, Performance Tracking, Capacity Planning, Workload Balancing, Decision-Making, Strategic Planning & Business Analysis, Business Transformation

Reporting & Documentation: Project Dashboards, Status Reports, RAID Logs, Project Charters, BRDs, FRDs, SOPs, Lessons Learned Documentation, KPI Development & Tracking

Quality & Delivery Management: Quality Assurance, UAT Coordination, Defect Tracking, Process Optimization, Continuous Delivery Improvement

CERTIFICATIONS

- Project Management Professional (PMP) — In Progress
- Google Project Management (GPM) — In Progress
- Salesforce Service Cloud Specialist
- Salesforce Advanced Administration
- Salesforce Administration Platform

KEY PROJECTS

AI-Powered Incident & Problem Management Automation

Core Skills: Generative AI, OpenAI, Prompt Engineering, RAG, ServiceNow, Python, ITIL

- Evaluated Generative AI opportunities to improve operational efficiency, automate knowledge retrieval, and enhance decision-making capabilities within support operations.
- Developed AI-driven frameworks leveraging LLMs and RAG concepts to generate actionable insights, accelerate issue resolution, and improve business productivity.

Service Reliability & Operational Excellence Analytics Platform

Core Skills: Tableau, Power BI, ServiceNow, Incident Management, Problem Management, Data Analytics

- Designed executive dashboards and business intelligence reports to monitor operational performance, KPI trends, SLA adherence, and continuous improvement opportunities.
- Leveraged data analytics to identify recurring operational challenges and provide recommendations that improved service reliability and organizational effectiveness.

Salesforce Einstein AI & Support Automation Initiative

Core Skills: Salesforce Einstein AI, Einstein Bots, Automation, SaaS Operations, Customer Support

- Assessed AI and automation opportunities to improve customer experience, operational efficiency, and support delivery performance.
- Implemented intelligent automation solutions that streamlined workflows, improved productivity, and enhanced decision-making through data-driven insights.

EDUCATION

Bachelor of Engineering (BE), Mechanical Engineering

Visvesvaraya Technological University (VTU), India | March 2011 – July 2015
